

JIHAD MAASARANI

AUTOMATION & AI SYSTEMS ENGINEER | TECHNOLOGY CONSULTANT

Beirut, Lebanon | +961 71 919 075 | jihadismasarani@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Technology consultant and full stack builder specializing in workflow automation, AI agent systems, and API driven integrations, spanning business rule and pipeline automation on enterprise platforms as well as self built AI agents that generate, test, and repair production systems. ServiceNow CSA/CAD and Oracle Java certified.

PROFESSIONAL EXPERIENCE

Technology Consultant, EY

Feb 2026 to Present | Beirut, Lebanon

- Owned automation of rollout workflows across multiple participating entities on the ServiceNow App Engine platform, designing business rule automation end to end and building the front end UI layer (NCGR).
- Advised on ServiceNow platform architecture for the National Center for Government Resource System (NCGR), a national Saudi government entity, contributing to on premise deployment strategy and infrastructure decisions beyond standard configuration.
- Automated a manual request intake process by building and delivering a request management demo application, translating stakeholder requirements into a working platform showcase used to support the client's decision making.
- Configured demand management automation workflows and business rules for Qatar University's ServiceNow Strategic Portfolio Management implementation.
- Supported the full solution lifecycle, including requirements gathering, development, testing, documentation, and rollout, across concurrent, automation heavy ServiceNow client engagements (NCGR).

Full Stack Software Developer Intern, Murex

Jun 2025 to Aug 2025 | Beirut, Lebanon

- Built ITBF, a full stack budgeting automation application for asset managers, using Angular, C#, .NET 9, PostgreSQL, and Docker.
- Automated fiscal year budget calculations by integrating ServiceNow data into a PostgreSQL pipeline driven by configurable growth and inflation inputs, removing a previously manual calculation step.
- Automated approval tracking, paid amount monitoring, and remaining balance visibility, giving asset managers real time insight into budget status without manual reconciliation.
- Wrote unit tests covering the core budgeting, calculation, and approval logic, catching regressions before they reached review and keeping the automation trustworthy as features were added.
- Set up and maintained CI/CD pipelines for the application, automating build, test, and deployment steps so every change was validated and shipped consistently.
- Deployed the application via containerized, TLS secured infrastructure using Docker, working within an Agile team and using Git for version control and code review.

Software Engineer, Lebanese News Aggregator (Independent Project)

Jan 2025 to Jun 2025 | Remote

- Built a bilingual news aggregation platform using React, FastAPI, and MongoDB while receiving mentorship from a Meta software engineer, pulling from six Lebanese news sources via RSS feeds, APIs, and web scraping.
- Automated article summarization and dynamic content filtering by integrating Google Gemini into the ingestion pipeline.

SELECTED PROJECTS: AI AGENTS & AUTOMATION

- AI Assisted Development with Claude Code (Claude Code, agentic coding workflows): Uses Claude Code daily as a primary development environment, driving the design, build, testing, and shipping of the API Integration Agent and Data Quality & Repair Assistant below, plus day to day debugging and refactoring across projects.
- API Integration Agent (AI agent, REST APIs, sandbox testing): AI developer tool that turns API docs into tested integration code, identifying endpoints, auth, and schemas, generating connector code, running sandbox tests, and self correcting from errors, with rate limits, retries, logging, and approval gates before changes ship.
- Data Quality & Repair Assistant (AI agent, SQL, relational databases): AI assistant that investigates data quality issues via SQL checks and an agent workflow, proposing explained corrections with change previews, approval controls, audit logs, and transactional rollback.
- WhatsApp Educational Bot (n8n, workflow automation): Automated WhatsApp bot that teaches users on topics of their choice via n8n orchestrated conversation flows.
- AUBIFY (React, Node.js, MongoDB): Social platform for AUB students with authentication, profile management, and real time interaction.
- MediLog (React, Spring Boot, MongoDB, Docker): Role based medical records app for medications, vaccines, and lab results, with secure doctor access links.
- Computer Vision Models (PyTorch, VGG16): Transfer learning classifiers achieving 99% accuracy on dog breeds and 90%+ on flower species.

CORE SKILLS

AI Agents & Automation: Claude Code, agentic AI workflows, API integration & sandbox testing, SQL data validation & repair, approval/rollback controls, n8n orchestration, prompt driven code generation

Consulting & Delivery: Business analysis, requirements gathering, stakeholder management, solution architecture, workflow automation, demand management, change management, Agile/SDLC, project rollout, documentation

Engineering Practices: Unit testing, CI/CD pipelines, Git version control, code review, containerized deployment (Docker), TLS secured infrastructure

Platforms & Engineering: ServiceNow (App Engine, ITSM, SPM), n8n, Java, Python, Machine Learning, PyTorch, TensorFlow, JavaScript/TypeScript, React, Angular, C#/.NET, FastAPI, Spring Boot, Node.js, SQL, PostgreSQL, MongoDB, Docker, Docker Compose, Git, Linux, Jira, GitHub, Bitbucket

CERTIFICATIONS

- ServiceNow Certified System Administrator (CSA)
- ServiceNow Certified Application Developer (CAD)
- Oracle Certified Professional (OCP), Java
- AI Programming with Python Nanodegree, AWS
- DataCamp coursework: Python, Pandas, SQL

EDUCATION

Bachelor of Science in Computer Science, American University of Beirut | Jan 2023 to Dec 2025 | GPA 3.86/4.0, Dean's Honor List, full scholarship

Achievements: FLL Championship winner (2018, 2019) | Represented Lebanon at the 2019 Arab FLL Championship, Jordan | Best Mechanical Design Award
